End Application:

F100-pw-100/200/220/220e/229 aircraft engine

Nominalheight:

2.000 inches

Nominaldiameter:

10.000 inches

Special Features:

Circular configuration; company item name-front compressor front hub hydraulic chuck

Functional Description:

Used as a holding device when checking the concentricity and squareness runout of front compressor rotor stator during compressor assembly

Reference Data And Literature:

33d4-6-550-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
