End Application:
F100-pw-100/200/220/220e/229 aircraft engine
Nominalheight:
2.000 inches
Nominaldiameter:
10.000 inches
Special Features:
Circular configuration; company item name-front compressor front hub hydraulic chuck
Functional Description:
Used as a holding device when checking the concentricity and squareness runout of front compressor rotor stator during compressor
assembly
Reference Data And Literature:
33d4-6-550-1
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A505c0
