Product Name:

Test station, gyro

Special Features:

Old item nametest station, gyro

Functional Description:

Used to balance and to check out gyroscope assemblies of inertial navigation systems, measures torque valves action on the gyro float, determines flotation temp, determines magnitude of voltages present in gyro pick off sygnals and rotational freedom of inner and outer gimbal pivots

Reference Data And Literature:

To 33d3-6-46-2

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
