Special Features:

C/o aluminum framework comprising an aluminum drilled manifold which will direct fluid to the item to be tested and to act as a restraining device for one end of the component

Functional Description:

Used to hold hyd expansion/or swivel joints to check for operation leaks of components tested

Reference Data And Literature:

Y.O. 35-1-181

Supplementary Features:

17.500 in. H, 7.100 in. W, 6.000 in. Deep

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
