Overall Length:

18.000 inches

Overall Height:

23.000 inches

Overall Width:

12.000 inches

Product Name:

Air data computer simulator

Special Features:

Suitcase type unit

Functional Description:

Used to simulate the cpu/43a central air data computer output for potentiometer, synchro, switch, rate generator, encoder and monitor circuits

Reference Data And Literature:

T.O. 33d7-3-54-5

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
