**Overall Length:**

18.000 inches

**Overall Height:**

23.000 inches

**Overall Width:**

12.000 inches

**Product Name:**

Air data computer simulator

**Special Features:**

Suitcase type unit

**Functional Description:**

Used to simulate the cpu/43a central air data computer output for potentiometer, synchro, switch, rate generator, encoder and monitor circuits

**Reference Data And Literature:**

T.O. 33d7-3-54-5

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A23900
