Overall Length:

11.000 inches

Overall Height:

20.000 inches

Overall Width:

20.000 inches

Special Features:

Portable unit; consists of an aluminum transit case, 3 flowmeters, 2 pressure gages, 3 valves, plumbing, adapters and hoses for connection with the oxygen converter system under test; a thermometer and level indicator are included on the front panel; case has carrying handle

Functional Description:

Provides a portable means of checking the operational suitability of a liquid oxygen converter system in the field; evaluations of 4 separate oxygen tests (leakage, evaporation loss, supply pressure and buildup pressure)

Reference Data And Literature:

T.O. 33d2-10-46-4 and 33d2-10-46-11

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
