End Application:

F-15 engine

Nominallength:

15.000 inches

Product Name:

Fixture, forward throttle quadrant rigging

Nominalwidth:

8.000 inches

Nominalheight:

6.500 inches

Special Features:

Steel

Functional Description:

Used to hold the throttle quadrant assembly and position the throttle lever arms in selected positions for switch replacement, adjustment, and throttle rigging

Unpackaged Unit Weight:

20.000 pounds

Reference Data And Literature:

Serd no. 2720; to 1f-15a-4-6

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0
