Overall Length:

18.000 inches

Overall Height:

10.000 inches

Overall Width:

12.000 inches

End Application:

E-3a aircraft

Product Name:

Signal distribution radio card test adapter assembly

Special Features:

Provides access to 29 essential input/output signals which can be monitored and the functional status established for each card under test.

The test adapter is contained in a suitcase type enclosure which includes the test point panel and storage provisions for the test cable and connector

Functional Description:

Used to provide access to the circuit card test point receptacle on the signal distribution panel (sb-3787/a and sb-3786/a) during fault isolation testing of these units

Material:

Aluminum alloy case

Reference Data And Literature:

To 35-1-251-1 & 12r2-2a-122

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A537k0
