End Application:

F100-pw-100/200/220 aircraft engine

Nominalheight:

1.000 inches

Nominaldiameter:

18.592 inches

Special Features:

Company item name-ring, brazing

Functional Description:

Used to hold new felt metal segments at tip seal in the 12th stage compressor stator while brazing

Reference Data And Literature:

Serd no. 2804

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
