**End Application:**

F100-pw-100/200/220 aircraft engine

**Nominalheight:**

1.000 inches

**Nominaldiameter:**

18.592 inches

**Special Features:**

Company item name-ring, brazing

**Functional Description:**

Used to hold new felt metal segments at tip seal in the 12th stage compressor stator while brazing

**Reference Data And Literature:**

Serd no. 2804

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A505c0
