Overall Length:

9.000 inches

Overall Diameter:

5.500 inches

End Application:

E-3a awacs

Special Features:

Consists of a spherical pressure vessel with a bladder to separate the fc-77 fluid from the pressurizing gas. The accumulator is equipped with an air valve for pressurizing and threaded port for an output

Functional Description:

Used in conjunction with the fc-77 toff bottle hose and adapter, part number 954a805g01, to replace small quantities of fc-77 fluid without introducing air into the system, as required by the thermal stabilization system and after replacement of the thermal stabilization unit filter during organizational and depot level maintenance

Reference Data And Literature:
