**Overall Length:**

9.000 inches

**Overall Diameter:**

5.500 inches

**End Application:**

E-3a awacs

**Special Features:**

Consists of a spherical pressure vessel with a bladder to separate the fc-77 fluid from the pressurizing gas. The accumulator is equipped with an air valve for pressurizing and threaded port for an output

**Functional Description:**

Used in conjunction with the fc-77 toff bottle hose and adapter, part number 954a805g01, to replace small quantities of fc-77 fluid without introducing air into the system, as required by the thermal stabilization system and after replacement of the thermal stabilization unit filter during organizational and depot level maintenance

**Reference Data And Literature:**

To 35-1-251-1

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
