Overall Length:

30.000 inches

End Application:

F/tf-15a aircraft

Product Name:

Puller assembly, mechanical, main landing gear high pressure piston

Special Features:

5 lbs

Functional Description:

Used to grip piston and provide a means to overcome seal friction when pulling out piston during mlg strut disassembly

Reference Data And Literature:

Serd 3428; to 1f-15a-4-6

General Description:

Aluminum, anodize; 1.500 in. Diameter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
