Overall Length:

12.000 inches

Overall Height:

10.750 inches

Overall Width:

8.750 inches

End Application:

E-3a awacs age.

Test Item Connection Method:

Cable

Product Name:

Total air temperature test adapter

Special Features:

Consists of a test panel with seven test jacks, and a cable with connector which interfaces with the total air temperature probe. The test adapter assembly is contained in a suitcase type enclosure which includes storage provisions for the test cable in the case lid

Functional Description:

Vused during maintenance of the total air temperature system to perform a resistance measurement check of each individual sensor element and de-icing heater element of the total air temperature probe, rosemount, inc., p/n 102ah2ag

Material:

Aluminum alloy case

Reference Data And Literature:

To 35-1-251-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A537k0
