End Application:

F/15a aircraft age.

Nominal length:

16.000 inches

Nominal width:

10.000 inches

Nominal height:

12.000 inches

Special Features:

Steel; company name-fixture, holding alignment, (fuel component)

Functional Description:

Used to position and clamp the end housing of the fuel transmitter to the main body

Unpackaged Unit Weight:

50.000 pounds

Reference Data And Literature:

Serd no. 3380

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
