End Application:

Gyro part number 79168-302 and 79168-303

Nominalheight:

5.375 inches

Nominaldiameter:

7.000 inches

Special Features:

Requested name- overspeed, bomb

Functional Description:

Used at depot level to contain a gyroscope motor assembly during wheel characteristic tests in a hydrogen environment. It is used in conjunction with the 170deg f heater block to test a motor assembly under conditions similar to those of a gyroscope in normal operation:

6-7 psig hydrogen atmosphere at 170 + 5deg f temperatures

Reference Data And Literature:

T.O. 33d2-8-1-301 and t.O. 5a11-2-66-3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
