End Application:

Tf30 aircraft engine age.

Nominalheight:

8.750 inches

Nominaldiameter:

14.500 inches

Special Features:

Matl: steel; c/o base, rod and misc hardware

Functional Description:

Used to hold front compressor front hub during machining

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
