Functional Description:

Ita panel would incorporate provisions for routing and switching of the power, stimulus and measurement requirements summarized in the functional analysis for both the 16vf101-10 and 16vf010-20 mode select couplers; in addition this panel will provide approx 14 load resistors. All power stimulus, switching and measurement requirements would be provided by the test station

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
