End Application:

F-16 mechanically actuated nose landing gear sequence valve 57200-1

Special Features:

Test fixture, valve/consists of mtg base, jackscrew assembly, dial indicator assembly, compression ring force gage

Functional Description:

Used to measure spool displacement and the force required to affect spool displacement during functional test of nlg sequence valve

Reference Data And Literature:

To 4sa3-40-3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
