End Application:

J85-ge-13, -21, 21a aircraft engine

Special Features:

7fuel delivery section; component including drive; fuel receiving; remotely located on explosion proof electrical cabinet; 220.0/400.0 vac, 50.0 hz, 3-phase; contains built-in fire suppression system; 120.000 in l, 96.000 in w, 84.000 in h; 10000.0 lbs

Functional Description:

Designed to functionally test ab control and pump to assure their proper operation after overhaul

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
