Aa-9.3

Special Features:

115.0/208.0 vac, 400.0 hz, 3-phase; 28.0 vdc; 108.000 in I, 84.000 in w, 59.000 in d; 4550.0 lbs

Functional Description:

Designed to test ac or dc powered aircraft fuel booster pumps for operation and performance characteristics under simulated flight conditions

Reference Data And Literature:

T.O. 33a6-7-9-1, -1c, -4

Fsc Application Data:

Fuel booster pumps

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
