End Application:

An/apq-158 forward looking rader age.

End Item Source:

96214

End Item Name:

Test station

Special Features:

5incorporates the circuitry necessary to individually control each phase voltage amplitude and to monitor phase rotational sequence. Panel contains master power switch for emergency power cutoff. Panel is housed in the test equipment mounting rack

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
