Overall Length:

3.750 feet

Overall Height:

4.167 feet

Overall Width:

1.500 feet

Assembly Form:

Rigid

End Application:

F-16 a/b aircraft

Work Holding Device Position Adjustability:

Adjustable

Functional Classification:

Hh-1.5

Functional Description:

Used to provide a means to hold the engine starter assembly gearbox in various positions to facilitate assembly and disassembly during maintenance

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T361-c
