End Application:

F-15a/b/c/d, fmf-15a/c/d, fmf-15a age; constant speed mechanical drive series 711595

Nominal length:

18.000 inches

Nominal width:

5.000 inches

Nominal height:

5.000 inches

Special Features:

Steel and aluminum; company name holding fixture, constant speed drive

Functional Description:

Used to determine the number of shims to be placed between the differential bearing outer race and the differential bearing race liner of the constant speed drive

Unpackaged Unit Weight:

15.000 pounds

Reference Data And Literature:

Serd no. 3584; to 9h6-3-36-4

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
