Major Components:

Printed wiring board 1; capacitor 5; crystal diode 1; diode 11; integrated 3; relay 1; resistor 43; transistor 7

End Application:

F-16 aircraft age.

Component Quantity:

72

Usage Design:

Current control assembly, a3

Mounting Configuration:

Mounted type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T01200
