Major Components:

Printed wiring board 1; capacitor 28; integrated circuit 35; resistor 24; relay 17; connector 1; insulator, connector 1

End Application:

F-16 aircraft age.; ais test station /2120300-005

Component Quantity:

107

Usage Design:

Pcb, power switch control

Mounting Configuration:

Mounted type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T01200
