End Application:

F-16 aircraft age.

Special Features:

C/o 1 holding fixture and 2 precision pins; the two pins when attached to the calibration mirror with the jacking screws define two points. These two points along with a point determined from one of the back pins defines a plane. This plane intersects the reference axis at a 9 degree angle in pitch; company item name-absolute alignment assembly

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
