End Application:

F-100-pw-100, 200 turbofans age

Special Features:

Characteristics are depth 10.109 inch digital pressure receiver, height 3.875 inches digital pressure receiver; length 8.218 inches digital pressure receiver; 20.25 inch depth transmitter enclosure; height 18 inches transmitter enclosure; length 24.5 inches transmitter enclosure; 100-125 volts ac voltage; 20-30 volts dc; 50 - 60 hertz frequency; 1 phase; 40 power consumption

Functional Description:

Used to sense and display various engine system pressures during testing of f100 series engines

Reference Data And Literature:

T.O. 33d4-6-658-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
