General Description:

Determines transmittance of germanium windows; major components-detector head, source head and instrumentation panel; measures transmittance at 9.5 to 10.5 um wavelengths; 16 in. Lg, 12 in. W, 11 in. H; 25 lbs; 115v, 60 hz, single phase, 60w

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
