End Application:

F100-pw-100/200 aircraft engine

Nominal length:

6.000 inches

Nominal width:

4.000 inches

Nominal height:

2.000 inches

Special Features:

Company item name-fixture

Functional Description:

Measures position of bellows during calibration of the jfc-110 backup fuel control

Reference Data And Literature:

Serd no. 3698

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
