End Application:

F-16a/b aircraft age.

Nominal length:

54.240 inches

Nominal width:

12.000 inches

Nominal height:

16.070 inches

Special Features:

Used during overhaul of the horizontal tail/flaperon actuator assembly pn 3833205-1 and the rudder actuator assembly pn 3834192-1

Functional Description:

Provides means of rigidly holding the outer race of an installed end bearing, applying the specified tension and compression loads, and measuring inner race movement of the end bearing

Unpackaged Unit Weight:

680.000 pounds

Reference Data And Literature:

33da21-336-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
