End Application:
F-1I aircraft age.
Special Features:
Company item name-adapter, interface test
Functional Description:
Provides electrical/mechanical interface between sample hold pcb and analog test station; inlcudes- wiring; power supply programming
components for fixed power sources; load, signal conitioning circuits, special switching circuits; input circuit paths for power, stimuli, signal
sequencing/conditioning; output circuit paths for waveform analysis, voltage amplitude measurements, time interval measurement, power
measurements, loads, signal conditioning
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
