End Application:

F-16a/b aircraft age.

Special Features:

Test set, inverter control/simulated 2 dc bus inputs-28 vdc; emergency generator converter input-24vdc; provides battery test and self test; measures 26v; 800hz inverter output; measures 22.5 vdc internal power to inverter circuit; 28vdc ok signals; 7.5 vdc ok signal; provides variable simulated battery voltage w/battery removed

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
