**End Application:**

F-16a/b aircraft age.

**End Item Source:**

07217

**End Item Name:**

Test station

**Special Features:**

Tdesigned to interface the cabin air tempreature selector with a digital multimeter and a dc power supply, used to interface the cabin air temperature control with a digital mulitmeter, dc power supply, wheatstone bridge, three resistance decades and a storage oscilloscope. A standard thermister will be included with the test panel. Banana jacks will be provided for interface connections except for lru adapter cables. Interconnect cable will be included for connecting 28 vdc power

**Functional Description:**

Used for a test panel to be used as a switching box and for interfacing test equipment; used to interface with cabin air temperature controller

**Reference Data And Literature:**

Serd no. 41119/b

**Supplementary Features:**

Company item name-panel test

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A23800
