End Application:
F-16a/b aircraft age.
End Item Source:
07217
End Item Name:
Test station
Special Features:
Tdesigned to interface the cabin air tempreature selector with a digital multimeter and a dc power supply, used to interface the cabin air
temperature control with a digital mulitmeter, dc power supply, wheatstone bridge, three resistance decades and a storage oscilloscope. A
standard thermister wil be included with the test panel. Banana jacks will be provided for interface connections except for Iru adapter cables
Interconnect cable will be included for connecting 28 vdc power
Functional Description:
Used for a test panel to be used as a switching box and for interfacing test equipment; used to interface with cabin air temperature controlled
Reference Data And Literature:
Serd no. 41119/b
Supplementary Features:
Company item name-panel test
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A23800
