Assembly Form:

Rigid

End Application:

Tf34-ge-100 turbo fan engine

Work Holding Device Position Adjustability:

Nonadjustable

Special Features:

Consists of a rabbit plate welded to a tublar frame; three casters (one steerable); used in conjunction with low pressure turbine retainer fscm 07482 part number 21c5041g01; approx. Size 480.000 in. L; 15.000 in. H; 48.00 inw.; 200.0 lbs wt

Functional Description:

Used to perform vertical engine hot section maintenance with the fan section installed

Reference Data And Literature:

T.O. 2j-tf34-116-3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T361-c
