**Overall Length:**

5.000 inches

**Overall Height:**

0.850 inches

**Overall Width:**

1.350 inches

**End Application:**

F-16 aircraft age. Radio frequency; ais test station, 2212450-003

**Product Name:**

Radio frequency linear amplifier

**General Description:**

Olid state; 4-40 unc-2b 0.160 deep 3-places; frequency range 9.0-10.6 ghz, 6.0-8.99 ghz and 10.61-11.0 ghz; rf input power available minus 10 to plus 7.5 dbm; rf output 50 ohms; dc output power; voltage plus 13 min, 900 ma max; oper temp 0c to 70c; oper altitude 0 to 6,000 ft

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
