**End Application:**

F-15 aircraft age

**Functional Classification:**

Aa-9.2

**Special Features:**

C/o movable storate/work cabinet, 465b oscilloscope, 8600a digital voltmeter; emergency off panel; controller; power distribution panel; and blower fan cooler; operating temperatures: 32 degrees f min; 122 degrees f max; voltage: 115 vac; frequency 50 hertz min to 60 hertz max; power consumption: 10 amperes

**Functional Description:**

Provides capability to adjust or align test the horizontal situation indicator

**Unpackaged Unit Weight:**

315.000 pounds

**Reference Data And Literature:**

T.O. 33da42-40-1

**Supplementary Features:**

Company item name-test station, horizontal situation indicator

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A23800
