End Application:

F11p/w100/200 engine

Nominalheight:

4.000 inches

Nominaldiameter:

24.000 inches

Functional Classification:

Gg-7.4

Special Features:

Steel

Functional Description:

Used to assemble 12th stage inner shroud vanes & outer shroud together for tackweld operations

Reference Data And Literature:

T.O. 2j-f100-94

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
