End Application:

F-15a/b/c/d aircraft age.

Nominalheight:

0.750 inches

Nominaldiameter:

6.000 inches

Special Features:

Jc/o circular aluminum base plate to which is attached by means of 2 cap screws, a 4.000 in. Dia., by 2.750 in. H. Aluminum support. Both bottom of base plate and area under the support are covered w/rubber sheet

Functional Description:

Used to support the ins stable element assembly with the lower gyro and accelerometer

Unpackaged Unit Weight:

2.000 pounds

Reference Data And Literature:

Serd no. 3822

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
