End Application:

T56-a-15 turbo-prop engine

Nominallength:

3.440 inches

Nominalwidth:

1.250 inches

Special Features:

Matl: steel, sae 52100, harden to rockwell 61-65; surface treatment: ams 2485 black oxide

Functional Description:

Used to produce groove on o ring seal at splitline in oil passage w/transfers prop brake oil from rear housing to the inner diaphragm;
contains 4 holes

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
