Overall Length:

102.000 inches

Overall Height:

54.000 inches

Overall Width:

48.000 inches

End Application:

T56-a-9/a-7 engines age.

Functional Description:

Permits flow of compressed air for turbine vane segment area measurement

General Description:

Power requirements 230/460 v ac 3 phase, 60 hz 15 kva

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
