End Application:

B-1b aircraft age.

Functional Classification:

Aa-9.1

Special Features:

C/o interface test adapter, electrical cables, rotary/tilt table, software

Functional Description:

Used to interconnect and control inertial navigation unit and automatic test equipment during fault detection, fault isolation and repair verification of inertial navigation, ; performs status monitoring, generates velocity, position, heading, attitude and time word outputs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A23800
