End Application:

F101-ge-102 engine age.

Product Name:

Cooling tank

Special Features:

Open topped cloth reinforced epoxy tank, with opening at one end so end of turbine shaft can be inserted and slipped over tubular stop on other wall of tank

Functional Description:

Used during assembly of low pressure turbine shaft to aft fan shaft to cool forward end of lpt shaft eliminating interference on mating diameters

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
