End Application:

B-1b aircraft age.

Product Name:

Liquid quantity gauging test set

Special Features:

C/o coaxial cables assemblies; terminals; fuel tight bulkhead connectors; tank sensor units; compensators; accommodates a selector panel and all required cables to permit all required test operations and functions to be performed with the sensor tester and selector panel mounted in the carrying case

Functional Description:

Used to perform measurements on twelve individual sensors in one fuel tank

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
