End Application:

F101-ge-102

Test Item Connection Method:

Connector

Product Name:

Data acquisition unit, engine cycle counter

Special Features:

Performance data from the b1b f101-ge-102 engines; extracts information from the signal processor and transfers data to a ground based computer system; directly interfaces w/the engine cycle counter and ground based computer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537k0
