Overall Length:

4.000 inches

Overall Height:

1.000 inches

Overall Width:

3.000 inches

End Application:

F108-cf-100 aircraft engine, kc-135r airplane

Special Features:

Silicone rubber, 50a durometer; has adequate acid resistance to withstand the acidic residue which remains in the blade from previous testing

Material:

Rubber synthetic

General Description:

Is required to channel the backflush water through the cooling holes and out the base of the dovetail when inspecting the turbine blade

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
