**End Application:**

F111 aircraft ground support equip

**Inclosure Feature:**

Multiple item w/carrying case

**Test Type For Which Designed:**

Attack radat and terrain following radar systems and the countermeasures receiving set

**Special Features:**

Kc/o regulated nitrogen pressure supply mounted in a portable aluminum chest; a hose assembly is provided for connection of test set to wave guide under test; nitrogen supply cylinder is provided with charging valve

**Functional Description:**

Used to perform pressurization, purging and leakage test operations on the attack radar and terrain following radar systems and the countermeasures receiving set; used in conjunction with model 117 ultrasonic translator for performance of leakage tests--provides pressure supply, controls, gages, flowmeters, and interconnecting hoses to obtain desired pressurization and flow measurements

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T228-a
