Overall Diameter:

5.500 inches

End Application:

B-1b aircraft age.

Product Name:

Load and lock shaft fixture

Functional Description:

Used to apply a load of approximately 10.0 lbs to the bevel gearshaft and to hold the gearshaft secure when checking for specific amount of backlash between gearshaft and its mating bevel gear during depot level maintenance of auxiliary power unit gas turbine engine

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
